Beyond Collaboration

MAXHUB

MAXHUB Portable Capture System

For scenarios such as school teaching, themed activities, corporate lectures, church worship, and comedy club stand-up performances, MAXHUB has introduced a Portable Capture System. It is based on a Portable capture host, wireless cameras, and wireless microphones, which can be quickly set up. With flexible deployment, easy use, automatic tracking, and intelligent directing, it is not limited by the environment and meets the needs of various scenarios for live and recorded broadcasting.

Wireless and Portable, Easy Setup

- Supports the use in various scenarios such as outdoor playgrounds, large auditoriums, lecture halls, theaters, and churches, without being restricted by the environment.
- The host, camera, and microphone have built-in batteries, eliminating the need for external power sources, making it easy to set up a Portable Capture System.

Extended Battery Life and No Power

- Supports an extended 6-hour battery life, ensuring stress-free recording for meetings and performances.
- Built-in screen displays the status, providing a clear view of the power usage for the camera and.

Supports single-person tracking recording, making outdoor directing more effortless. Enhanced by AI tracking algorithm, automatically tracks the main speaker.

- The wireless pan-tilt camera is equipped with an AI tracking algorithm, allowing manual selection of tracking targets for the camera to automatically follow, achieving semi-automatic recording.

Stable Connectivity and Instant Live Interaction

- Built-in Wi-Fi 6 and wired connection, offering dual networking options for mutual backup, ensuring quick and stable event deployment.
